

Experience More with Access Bank's AccessMore

Introducing the **AccessMore App**, a new digital banking platform that brings customers greater convenience, flexibility, and freedom in managing their everyday banking needs. As part of the bank's continued commitment to improving the customer experience, AccessMore replaces the **SaruMoney App**, offering customers a wider range of digital banking services on a single platform.

With AccessMore, customers can transfer funds locally and internationally, buy foreign exchange, pay bills, purchase airtime, and manage their cards anytime, anywhere.

Highlighting the significance of this milestone, **Shep Aisam, Managing Director of Access Bank Botswana**, said:

"Financial inclusion is not simply about opening accounts. It is about empowering people with tools that improve their financial wellbeing and create opportunities for economic participation. We want every customer to feel that banking is within reach and built with them in mind."

Beyond everyday transactions, the platform supports greater financial participation by providing customers with tools and resources that encourage better financial habits, including budgeting, saving, and responsible borrowing.

As digital banking continues to grow, AccessMore brings customers closer to a banking experience that is convenient, inclusive, and built around their needs. Whether at home, at work, or on the move, customers can access essential banking services when they need them most.

Download the AccessMore App today and enjoy the freedom to bank anytime, anywhere.
